

Cybersecurity

Joseph

STUDIED

Bachelor of Information Technology

WORKS AS

TX Engineer

Joseph was always fascinated with the world of technology, and after chatting with someone in the IT industry he knew it was what he wanted to do.

The Bachelor of Information Technology at Whitireia felt like the perfect fit for Joseph; "One of my favourite things was the smaller class sizes. I got to build genuine relationships with my tutors as well as the other students," he says.

Throughout his studies, Joseph was introduced to the skills and knowledge needed to pursue a career in IT. He learnt a wide range of concepts that helped him understand different facets of the industry; "At the time I didn't know which part of IT I wanted to focus on, so learning about a broad range of areas was really helpful."

"The best thing I ever did was study tech."

In his final year, Joseph completed a capstone project where he worked directly with industry to create IT solutions for real-world problems. Building those industry connections before entering the workforce was key to Joseph's success.

Now a Senior TX Engineer at New Zealand's biggest wealth development platform Sharesies, Joseph is proud to use his skills to support his colleagues and ensure they have the technology to do their best.

Joseph encourages anyone interested in tech to get into the industry; "IT is for everyone, you don't have to fit into the typical 'IT stereotype' to work in the industry, being different is valuable."

Graduate Certificate in Cybersecurity

📖	Level 7
🕒	17 weeks, full-time (part-time options available)
💰	\$3,600 (indicative for 2023 intake)
🌐	\$10,562* (indicative for 2023 intake)

Take your Tech career to the next level with skills to make you stand out from the crowd. Learn the systems to integrate security policy, practices and technologies into existing infrastructure. Gain a qualification designed alongside industry and giving you the skills to be work-ready.

Programme outline

The aim of the Graduate Certificate in Cybersecurity (GCertCS) is to create a set of information technology professionals who have the ability to think about information security and assurance within an enterprise system, and know how to integrate security policy, practices and technologies into an operational infrastructure.

Study part-time

This programme includes part-time study options for people who want the flexibility of studying while they manage other commitments.

More detail about this qualification

The Graduate Certificate in Cybersecurity is a 60 credit programme, divided into four 15 credit courses. There are two compulsory courses and two electives.

Students must complete 60 credits at level 7 consisting of:

- CS7501 Information Security III and IT7502 Digital Ethics
- Two elective courses at level 7 chosen from the course list below

Courses

Compulsory courses

[IT7502 – Digital Ethics](#)

[CS7501 – Information Security III](#)

Elective Courses

[CS7503 – Network Fundamentals for Information Assurance and Security](#)

[CS7504 – Security for DevOps](#)

[CS7505 – Incident Response and Digital Forensics](#)

[CS7506 – Cloud Security](#)

[IA7307 – Cryptography and Security Mechanisms](#)

[IA7308 – Security Testing and Network Defence](#)

Career options

Graduates will have the skills and knowledge to work in the IT industry in a range of roles such as security consultant, security analyst, security administrator, SecDevOps/DevSecOps, incident analyst, incident handler, information assurance analyst, security assessor/auditor, security engineer, penetration tester, digital forensic analyst, network forensic analyst, malware analyst, security developer or other information/cyber security-related support roles e.g. service desk.

Entry requirements

Domestic

A degree in Computer Science or Information Technology or equivalent preferably with Network, or equivalent practical, professional or educational experience in the IT industry.

International

IELTS 6.0 with no band score lower than 5.5 (or equivalent) and academic requirements.

Find your country's [equivalent academic entry requirements here](#)

** International fees shown here do not include insurance and administration (currently approximately \$924 per year of study)*
